

psDemandIT+ Managed Services

tech support done right

We Offer Business IT Solutions and Managed Services

Managed Services is the practice of outsourcing day-to-day IT management and Computer Network Tech Support as a cost-effective method for improving business operations. You can have a team of highly skilled network engineers and computer technicians service your business computers at a fraction of a cost of a full-time employee.

We provide professional, reliable IT support, network system integration and consulting services. Our custom services range from Managed IT services, supplying and testing hardware, software and networking solutions, to custom applications development. Our Managed Services / Computer Network Support are local to New Jersey, New York and North Carolina area and our clients respective satellite locations throughout the world.

TOP 7 BENEFITS OF MANAGED IT

1. Money Savings:

Our psDemandIT+ managed IT services program saves you money by helping minimize expensive network disasters

2. Proactive Solutions:

Clients experience better performance, fewer glitches, and practically zero downtime. The psDemandIT+ program helps detect these problems early thus prevent them from escalating into more expensive repairs and downtime.

3. Access to Professional IT Staff:

Clients can feel as though they have an in-house IT staff — without the full-time employees costs. As a psDemandIT+ client, you will have access to a knowledgeable support staff that can be reached immediately if you have any kind of computer problem or question.

4. Predictable Spending:

psDemandIT+ clients receive substantial discounts on IT services. Under this program, clients pay one flat affordable rate and get all of the technical support needed. No hidden charges, caveats, or disclaimers.

5. Faster Response Time:

psDemandIT+ clients receive faster response time support. Through our enterprise class monitoring and remote management systems, we have the ability to access and repair most network problems right from our Network Operations Center (NOC). If we cannot fix it from our NOC, in most cases we dispatch a technician to your office the same day.

6. Vendor Management:

We deal with the hardware and software vendors and “speak geek” on your behalf.

7. Peace of Mind:

As a psDemandIT+ client, you gain incredible peace of mind, having the knowledge that powersolution.com is making sure everything pertaining to your network security and reliability is handled properly, so you don't have to worry about it.

You take care of your business. We'll take care of your computers.
